

Saltwater Series XL SDS™

**NEW**

EFFECTIVE OCTOBER 6, 2014

Saltwater Series XL® SDS™ Propellers Receive Updated Shift Dampener System (SDS)

In 2007, Yamaha introduced the Saltwater Series XL line of three-bladed propellers specifically for its exclusive 5.3L V8 F350 outboard. Sporting specially-designed blades and a massive blade surface area, these propellers are key to helping the F350 generate up to 45 percent more thrust than 250 horsepower-class outboards. In 2009, F350 owners could enjoy the benefits of Yamaha's exclusive Shift Dampener System with the introduction of the Saltwater Series XL SDS propellers – quieter, clunk-free shifting and virtually noise-free in-gear operation.

These propellers continue to be the outstanding performers they have always been, and owners of Yamaha F350 5.3L V8 outboards will continue to enjoy the benefits of Yamaha's exclusive Shift Dampener System. The updated hub system doesn't require special hardware on the propeller shaft in order to operate and will now more easily backfit older F350s that currently do not use the Shift Dampener System.

The updated Saltwater Series XL SDS propellers continue to be available in right- and left-hand rotation, in 15", 17", 19", 21", and 23" pitches. They offer the same great performance and the same great level of quiet and smooth operation that their owners have always known and loved.
