

CL7™ Touchscreen Display

EFFECTIVE
FEBRUARY 16, 2017

Yamaha Introduces New Multi-function Display with Access to Helm Master® Set Point™ Functionality

Yamaha continues to innovate in providing accurate and instant information about boat and outboard systems. In 2017, Yamaha brings the CL7 touchscreen display on board.

Yamaha's all-new display features a seven-inch touch panel with full multi-function display (MFD) capability and connectivity. It offers precise engine and boat systems data for up to four outboards on one screen, along with other MFD functions, such as maps, fish finder, and graphing capabilities through its built-in 10 MHz GPS unit.

As the primary display for Helm Master, Yamaha's fully integrated boat control system, the CL7 is also the required point of access to Helm Master's new Set Point boat positioning functionality.

It also serves as the primary display for boats using Yamaha's Command Link Plus® system, which features digital electronic controls (DEC).

Yamaha specified and designed software to facilitate the capabilities and functions of its Helm Master and Command Link Plus® systems and selected Garmin®, an industry-leader, to provide the platform that could handle Yamaha's display needs.

The CL7 display is offered in two models: one with detailed fresh and saltwater maps built-in, and the other with basic maps that are easy to upgrade. Both models include detailed fuel flow information and a host of operator-customized functions and appearances.

The display also features a robust NMEA 2000® internal gateway, allowing displayed data to be output to approved MFD models and brands including Garmin®, Furuno®, Simrad® and Lowrance®.

PART NUMBER - RIGGING KITS	DESCRIPTION	EXPECTED AVAILABILITY
MAR-CL7DU-KT-00	Command Link Plus CL7 Display Kit (Basic Maps) Includes: 1 Command Link Plus CL7 Display; 1 Command Link Plus Main Bus Adapter Harness; 1 Display Cover	May 2017
