The Perfect Propeller for Fishing Flats

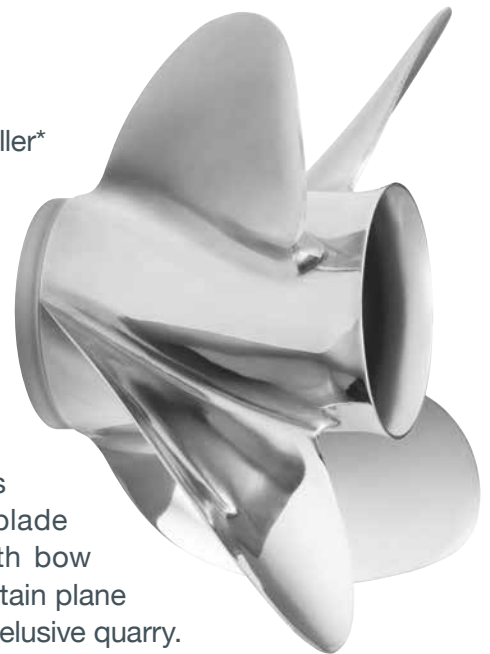

Experienced flats anglers know that a stealth approach makes all the difference in a successful fishing trip. Yamaha's quiet, powerful, and lightweight midrange four stroke outboards are a perfect power solution for flats fishing. Now there is a unique propeller solution that combines instant acceleration and high lifting capability with the stealth approach needed to help dominate flats fishing. Introducing Yamaha's new Talon SS4.

SDS QUIET

Yamaha took the flats-proven performance of their Turbo® FX4 propeller* and combined it with the newest iteration of Yamaha's patented Shift Dampener System (SDS™). Yamaha's new SDS system greatly reduces or eliminates shift clunk and propeller vibrations that may be present at low speeds. SDS also keeps things cushioned during high-speed operation.

APPLICATION-SPECIFIC FOUR-BLADE DESIGN

The new Talon SS4 combines four-blade lift and acceleration with quiet stealth to meet the requirements of flats anglers. Four blades provide additional surface contact area over conventional three-blade propellers – a design that provides great acceleration along with bow and stern lift. That means less draft on plane and the ability to maintain plane at slower speeds – perfect when scouting for the right fishing spot or elusive quarry. Additionally, four blades reduce bow rise and stern drop upon acceleration, which can help preserve the ecosystem (and your propeller) by helping reduce or eliminate bottom drag. There is no special hardware required to operate the new Talon SS4. Just bolt it on and go!

VERSATILE

Talon SS4 propellers fit Yamaha's line of powerful, quiet four stroke mid-range outboards from T50 through F115, in 14", 16", 18", 20", 22", and 23" pitches. They're made of highly-polished stainless steel, so they look as good as they perform. Talon SS4 propellers are scheduled for availability through more than 2000 authorized Yamaha Marine dealers in November, 2017.
