

# 2024 Yamaha JetBlaster®

## Overview

Introducing the Yamaha JetBlaster, designed for riders who want a lightweight, agile WaveRunner that is perfect for freestyle riding. This model comes with a range of features that make it highly maneuverable on the water. The JetBlaster is equipped with wide, raised handlebars that provide excellent control and stability, as well as integrated foot chocks that allow riders to maintain their balance during high-speed maneuvers. The JetBlaster features an exclusive, custom-tuned trim system that enables riders to optimize the watercraft's performance and stability based on their individual preferences.

## Yamaha Innovations and Technology

**Custom-Tuned Electric Trim:** The custom-tuned Electric Trim feature allows the rider to transform the JetBlaster's riding characteristics from serious to playful and everywhere in between. This Electric Trim, exclusive to the JetBlaster, is tuned to give the rider the ability to pop out of the water, do spins, and do whatever athletic riding the rider wishes.

**Raised, Lightweight Handlebars:** The JetBlaster's taller, wider handlebars allow the rider to have more leverage over the bars, and new performance grips reduce hand slippage and fatigue. Small switch boxes give the JetBlaster a cleaner look.

**Integrated Foot Chocks:** The addition of foot chocks placed where the footwells meet the stern provides a secure stance when riding standing up and effectively transfer body weight input to the hull when riding freestyle.

**RiDE® Dual Throttle System:** Provides independent functionality of the left and right handlebar levers, with the right lever controlling forward and the left lever controlling reverse. As a result, you can reverse by just using the left lever while keeping both hands on the handlebars. This provides single-action forward/reverse capability. It also provides the ability to decelerate using the left lever while riding.
