## Yamaha Innovations and Technology

**Helm Master EX:** Yamaha's 255 FSH Sport H model features Helm Master® EX for smooth, precise low-speed maneuvering with its twin jet engines—an industry first. Movement of the Helm Master EX joystick causes the boat to respond accordingly at low speeds—forward, reverse, laterally, and rotationally. The simplicity of this intuitive control helps build operator confidence and product satisfaction.

**Yamaha Marine Engines:** The supercharged 1.8L SVHO and the 1.9L normally-aspirated engine—the largest displacement available in jet boats today—are renowned for their reliability and durability. Yamaha's expertise in marine engineering ensures these engines deliver dependable performance, enhancing the value and enjoyment of Yamaha jet boats.

**Helm Wireless Charging:** Convenient wireless charging station integrated into the fixed smartphone holder located at the helm, allowing you to effortlessly charge compatible devices without the hassle of cords and cables.

**Patented Jet Drive System:** This advanced jet propulsion system utilizes an internal impeller rather than an external propeller. This design offers numerous advantages, such as shallow water operation, enhanced maneuverability, reduced maintenance, and the peace of mind of knowing that there is no lower unit or propeller at the stern of the boat.

**Patented Clean-Out Ports:** Exclusive to Yamaha Boats, the patented clean-out ports are a convenient way to remove debris that may get caught in the jet pump. This can help to prevent damage to the jet pump and keep it running smoothly. The clean-out port is located above water at the stern of the boat and is easy to access.

**Connex<sup>®</sup> Helm Control System:** Yamaha's award-winning Connex helm control system and touchscreen is the hub for entertainment functions, DRiVE<sup>®</sup> control, GPS mapping, and relevant boat system data when underway.

**Yamaha Articulating Keel:** This patented system extends the boat's keel and moves in perfect relation to the boat's jet pump nozzles to provide directional stability and maneuverability. Steering response is immediate. Straight-line tracking at all speeds is effortless, and cutting through chop is a breeze. Drivers enjoy maximum control while maneuvering at low speeds. (Excluding 255 FSH Sport H)

**Quiet Cruise Noise Reduction System:** This system of features works together to reduce vibration noise levels in Yamaha boats. These features include engine compartment insulation, hull insulation, and jet pump and exhaust system design.

**Lifetime Structural Limited Warranty** — Yamaha warrants the hull and deck of all new Yamaha boats against major structural defects in material or workmanship for the lifetime of ownership of the first retail owner. The structural limited warranty can be transferred to a second retail owner during the first 10 years after the date of original purchase by the original retail owner.
